

---

*Dear Dr Preeti,*

We as adults think we know what pain means having been through so much of life. But we had no clue how the definition would change for us during the last 4 months. But thanks to you, mom's quality of life stayed intact till the end. The only thing she dreaded was being bed ridden, which fortunately never happened.

We cannot thank you enough for your expertise shown on managing the pain and for giving us clarity at each stage as to how to handle things.

Thank you so much for being there for her and for us at each step.

*Mahendra, Rageshree, Bindu & Komal Porecha*
